

**Odin Ruz**

Odin is Playa Viva's resident permaculture expert. Permaculture is an ecological design system for sustainability that teaches us how to build natural homes, grow food, restore diminished landscapes, catch rainwater, build communities, and much more. Through Odin's work, our team is able to restore, recreate, and regenerate the lands encompassing Playa Viva, and do in years what would normally take generations. Odin is a musician, father, and craftsman/instrument maker who grew up in Huehuecoyotl, an internationally renowned ecovillage located in Mexico.
